

C++ Workshop

Course Description

This two-day class is a general introduction to the C++ language and object-oriented programming. You will gain a basic understanding of C++ and the benefits of object-oriented programming. In the hands-on laboratory sessions, you will put this knowledge to the test by writing simple but practical code.

Skills Developed

- Understanding the basics of OOP (object oriented programming)
- Understanding the language constructs

Skills Required

- Basic knowledge of the C programming language (the instructor will shortly refresh/introduce it on demand, if needed)
